Final object of the total source-to-archive accounting audit

19 October 2026

Audit summary

Totals in = totals accounted. 2,222 source items were enumerated and each received exactly one status (0 unassigned, 0 double-assigned).

- **Entries:** 635 (57 books, 578 pieces: Works 40 books / 116 pieces; AI-Assisted Work 17 books / 462 pieces). STANDALONE source items = 635 = entry count; every entry has exactly one canonical source.
- **Zero missing:** all 1675 standalone/enfolded written items have $\geq 95\%$ of their normalized passages present in the archive (minimum 95.0%), apart from the passages removed at the author's request (below). 1638 are $\geq 95\%$ inside their single target entry; 37 are multi-work compilations or combined manuscripts whose passages are present, once each, across 2–6 entries (listed in `accounting.csv`, column `also_in`).
- **Zero duplication:** passage-level check of every entry against every other entry (8-gram exact or 5-gram fuzzy, 40-word passages): **0 unapproved pairs** $\geq 50\%$, 0 pairs $\geq 80\%$. 24 further pairs share 30–49% (recurring poems and theory passages re-used across his books), listed in `lineage/audit_overlaps_30_50.csv`. No two entries share a title except the two distinct 2026-05-15 posts both titled *The Jungle* (different texts; a third same-titled post is catalogued under its subtitle).
- **Approved shared material (exception approved by David, 19 Oct 2026):** *THE TOTAL OPERATOR TEXT* (MASTER DOC 1) and *Theatre of the Chimera* share 50.5% of Total Operator's passages; *PHILOS* and *Keepers of the Hidden Flame* share 54.1% of PHILOS's passages. These are legitimate shared material between separate books, not duplicates: each is kept as its own book, the earlier merges were undone, and the pairs are recorded as APPROVED-SHARED in `lineage/audit_overlaps_30_50.csv`. *The World Soul* remains inside *The Journey of the Soul*.
- **AI reflections removed (19 Oct 2026, author request):** 102 AI-generated documents that reflect on, summarize, translate, clarify or interpret a text or his own work were removed from the AI-assisted sphere and are counted as commentary exclusions (SPHERES/removed_reflections.csv). Their former URLs redirect to the AI-assisted sphere.
- **American Mythology (19 Oct 2026):** the 454-page book *American Mythology: Orations on Baseball, History, and the Human Spirit* (2025-07-29) was added as a book; its 28 chapters held 28 former entries (27 Substack chapter posts and the *Cuba (1864-1908)* book with its 3 enfolded posts), which are now enfolded in it, with their 30 recordings attached at chapter level. Their former URLs redirect to the matching chapter. (*The Publication of*) *American Mythology* (an announcement) is a non-work exclusion.
- **Removed at the author's request (19 Oct 2026):** 5 AI-assisted entries (1 book, 4 pieces; 38,018 words; 9 source items incl. 4 enfolded in one of them) were removed whole, status EXCLUDED-AUTHOR-REQUEST; their former URLs redirect to the AI-Assisted Work index. In addition 22 passages (342 paragraphs, 34,051 words) were removed from five Absolute volumes (Vols XI–XV), together with the 10 contents-page lines (84 words) naming

sections removed in full — 34,135 words in all; the rest of each volume is unchanged, and the word counts shown are net of the removal. Sources are untouched; the build excludes this material and the reconciliation accounts for every removed word (SPHERES/women_exclusions.csv, SPHERES/women_redactions.json).

- **AI-Assisted de-duplication and sorting (19 Oct 2026):** a passage-level pass over all 492 AI-Assisted entries (pieces vs pieces, pieces vs AI books, AI entries vs Works) with 8-/5-gram shingle containment plus sentence-level near-verbatim tracing found 13 pieces that were earlier drafts, condensations or retitled versions of a larger or later AI-Assisted entry (42.7–87.8% of their sentences traced in the container, 14–71% near-verbatim). They are enfolded in that container under an *Enfolded:* heading that carries every paragraph not already present; their former URLs redirect to that heading (SPHERES/ai_dedup.csv, 116 logged decisions; lineage/ai_fold_redirects.csv). No AI book duplicates another, nothing was folded into or out of the Works sphere, and *THE TOTAL OPERATOR TEXT* and *PHILOS* stay standalone (approved shared material). The AI-Assisted index is now arranged in 19 thematic sections (books first), chronological within each, with 27 series linked part-to-part; 59 titles were normalised for display (original titles kept) and 123 dates corrected from the UTC to the America/New_York publication date (SPHERES/ai_groups.csv).
- **Integrity:** every enfolded item points to a live entry; no chains (former entries resolved to their final container); YouTube matched by metadata only (no transcript entries).
